

case study

project type

Corporate Display Area

project name

Interactive Display Area

location

Evendale, Ohio

client

GE
Aviation

scope

PEDCO was selected to remodel an existing basement corridor into a “state-of-the-art” interactive display space. The vision for this area was to create an experience that communicated the story of various components of a jet engine, and is meant to be an extension of the recently constructed Learning Center.

The Interactive Display Area features:

- Open ceilings with arched-metal accents
- Custom-designed display fixtures for each display item in the corridor
- Interactive displays
- Accent lighting.

services provided

Architectural, Interior Design, Mechanical, Electrical
