PEDCO Healthcare Group Leader Receives Healthcare Facility Design Professional Certification

Mr. Steve Weidner, PE, LEED AP, Vice President and Senior Project Manager for the Healthcare Group at PEDCO in Sharonville, has earned the distinction of a Healthcare Facility Design Professional through The American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE). The designation of Healthcare Facility Design Professional (HFDP) recognizes individuals who have demonstrated a well-rounded understanding and knowledge of medical terminology and facility operations as they affect HVAC design in healthcare facilities.

The program, which was developed in collaboration with the American Society of Healthcare Engineering (ASHE) of the American Hospital Association, requires that participants meet certain eligibility criteria before being allowed to participate. Individuals who have earned the HFDP certification have demonstrated mastery of a body of knowledge that subject matter experts have identified as reflecting best practices in the field of healthcare facility design.

“PEDCO continues to expand our healthcare expertise and the HFDP certification is another way for us to stay in the forefront of healthcare industry,” commented Bill Giesler, President of PEDCO. “PEDCO is able to provide clients with a unique

combination of expertise, certification, and talent to address our clients’ wide range of healthcare facility needs.”

PEDCO’s Healthcare Group works with a variety of healthcare clients bringing a new, invaluable perspective to healthcare facility planning, design and management. Our healthcare experience encompasses grassroots facilities, expansions, renovations and ongoing facility services. We invest the time needed to understand our clients’ facilities and systems in detail including mechanical, electrical and power/utilities systems. Our designs include brand new state-of-the-art hospitals from the ground up as well as specific facilities such as cancer treatment facilities, radiology centers, and emergency departments.
